NOT FOR EVERYONE

OX® tool watches are a world apart.

They break away from the conventions of traditional watchmaking savoir-faire to focus on what, in our view, truly matters: **construction excellence, purposeful engineering, and an unmistakable aesthetic and functional identity of their own.**

Every OX® shares genuine all-terrain capability. They are conceived for those¹ who choose to live a singular, intense life beyond established norms.

BUILT OTHERWISE.

¹ NONCONFORMISTS BY NATURE. THEY DO NOT FOLLOW ESTABLISHED PATHS OR TRENDS, BUT THEIR OWN JUDGMENT. MANY WORK IN DEMANDING PROFESSIONS; OTHERS LEAD FAR-FROM-CONVENTIONAL LIVES.

OX® Tool Watches

DOWN TO THE LAST SCREW

With an OX®, even the smallest components matter. Specific case, clasp and construction elements are designed from scratch for each creation, rather than adapted from standard catalog solutions.

The exception, naturally, is the mechanical movements. But even there, we leave our mark: we customize them and individually regulate each one to deliver accuracy beyond the manufacturer's standard specification.

FORM

Function comes first. Form responds.

At OX®, we add two non-negotiable requirements: aesthetic eccentricity and genuine comfort.

A large watch does not have to feel uncomfortable on an average wrist. Proportions, ergonomics and contact points are considered from the very first sketch.

You will never find a conventional OX®. Ever.

MATERIALS

The same name does not guarantee the same quality.

Titanium, sapphire, carbon and steel come in multiple grades, processes and finishes.

At OX®, we select each material for the real benefit it brings to the watch and to the person wearing it, not simply for the name it can display on a specification sheet.

The value should be in the watch. Not in the rhetoric.

INNOVATION

Small innovations. The big ones are still to come.

We believe a modern dive watch can — and should — offer usefulness beyond simply measuring dive time. That is why we incorporate functions such as True GMT and have developed ID+SYS™, a system designed to place essential information within reach of rescue and emergency teams when every second may matter.

It is just one example of the way we understand a tool watch.

FROG300 GMT & PRO

THIS IS NOT A WATCH.

IT'S AN OX®

For all of the above — and for many other details — it is sometimes difficult to simply call an OX® a "watch."

In our philosophy, price does not define the product.

What defines it is what we are capable of building for that price.

TAHITI LIME Inspired by the endless summer we all dream of living.

FROG300 UNIQUE BENEFITS

TOUGH AND SAFE

Changing a FROG300 strap is easy, quick and secure. Its Allen screws incorporate a special gasket that helps prevent them from loosening with use.

The titanium clasp adds a quick micro-adjustment system, ready for both everyday wear and fitting over a diving suit.

Each OX® FROG300 is designed to offer extreme resistance to water, impacts and the harshest conditions, to ISO 6425 standards for saturation diving watches down to 300 meters and MIL-STD-810H.

TITANIUM G3i Ti G3i

A TOOL WATCH FOR RIGHT-HANDED WEARERS

FROG300 watches have two features that make them instantly recognizable: their eccentric case and the crowns positioned on the inner side.

This architecture was conceived for the watch to be worn on the left wrist, leaving the hand completely free and preventing the crowns from pressing against it.

WR300M/1000FT

300 meters is not just a number.

Designing a watch for WR300M / 1000FT demands greater construction precision, tighter tolerance control and specific water-resistance solutions.

The result is an extra reserve of strength and confidence, both in and out of the water: from a dive to heavy rain, mud, humidity or any adventure where the environment turns hostile.

A FROG300 is built so you never have to wonder whether it will take it.

Cosmoband™
220 mm (standard)

QUICK-ADJUST TEXTILE STRAPS, WATER-RESISTANT AND FITTED WITH A VELCRO®-STYLE FASTENING SYSTEM, ARE INCLUDED AS STANDARD WITH PRO MODELS.

SOME FKM STRAPS INCORPORATE NO-DECO TABLES FOR RECREATIONAL DIVING WITH AIR OR NITROX.

ECCENTRIC

AESTHETICALLY.

TECHNICALLY.

OX® STRAP TOOL™. CHANGE. ADJUST. GO.

THE MYOX® APP ALLOWS YOU TO ENTER AND MANAGE THE INFORMATION STORED IN ID+SYS™ AND WILL BE AVAILABLE FREE OF CHARGE ON THE APPLE APP STORE AND GOOGLE PLAY.

The **OX® FROG300** was designed to help save your life. We hope that day never comes.

We developed **ID+SYS™**, a removable system that allows personal information and emergency contacts to be stored, making them easier for rescue teams to access when needed. Based on NFC technology, it requires no battery and no Wi-Fi connection. Protected inside the watch, the information can be accessed quickly using a compatible device.

THE COLLECTION
FROG300 GMT

MARINE TRUE GMT

DEPTH RAINBOW
OXF3-YEBMTI-DEPTH

BEST SELLER
FROM 2024-26

THE FLAGSHIP OF THE FROG300 GMT COLLECTION.

DEPTH RAINBOW turns color into part of its function. Its bezel features DEPTH-COLORGRAPH™, a chromatic reference inspired by the progressive loss of color underwater. The yellow strap also incorporates NO-DECO tables for recreational diving, reinforcing a personality that combines function, color and a genuine diving spirit.

HOW DOES DEPTH-COLORGRAPH™ WORK? As depth increases, water progressively absorbs certain wavelengths: warm colors lose intensity before blues and greens. Under natural light, DEPTH-COLORGRAPH™ allows this chromatic transformation to be observed visually.

SURF & DIVE

TAHITI LIME
OXF3-LIBLTI-LIME

One of the essential citrus fruits of tropical mixology gives TAHITI LIME its name, combining an impossible-to-ignore color palette with the spirit of summer, surf and ocean. Created for restless minds. For those already looking for the next challenge before finishing the last one.

It doesn't know how to stand still.

SAR TYPE

ORANGE RESCUE
OXF3-ORBKI-RESCUE

They save lives by putting their own at risk.

At sea, amid flames or in the aftermath of a natural disaster, search, rescue and emergency professionals belong to a category of their own. Trained to act when others need help, they are often unsung heroes.

ORANGE RESCUE is our small but heartfelt tribute to all of them.

ALL-TERRAIN EXPLORERS

BLACK EDITION
OXF3-BKBKI-BLACK

Classic in color. Anything but conventional in every other respect.

Powerful, eccentric and more than ready to become part of your gear for whatever challenge comes next.

BLACK EDITION is the safe bet for the less daring among the bold.

SHARK SKIN
OXF3-BUGYTI-SHARK

Inspired by one of the ocean's most extraordinary survivors, SHARK SKIN combines colors rarely seen in watchmaking with a dial pattern that gives it a distinctive and instantly recognizable identity.

All FROG300 models feature powerful luminescence. On most versions, we use two colors to visually differentiate the time of day from elapsed time.

At night, every OX® has a personality of its own too.

Some
watches
are
designed
to go
unnoticed.

The HOT
PINK will
never be
one of
them.

HOT PINK

OCEAN DIVERS

ALWAYS **SUMMER**

AITUTAKI
OXF3-TIBLBL-AITU

HOT PINK
OXF3-PINKTI-S26
[SPECIAL SUMMER EDITION]

Inspired by Aitutaki, one of those places where the ocean seems impossible to improve upon. Its combination of blues brings a piece of that paradise to your wrist.

Whenever you check the time, it's still summer.

Nothing is ever quite the same after a HOT PINK.

Color, fun and a personality impossible to ignore. But beneath that appearance, what really matters is still there: a powerful FROG300 GMT, with True GMT, ID+SYS™ and the full capability of an OX® tool watch.

Definitely not for everyone.

A new OX® creation is on the way.
Its initials may seem obvious.

The watch isn't.

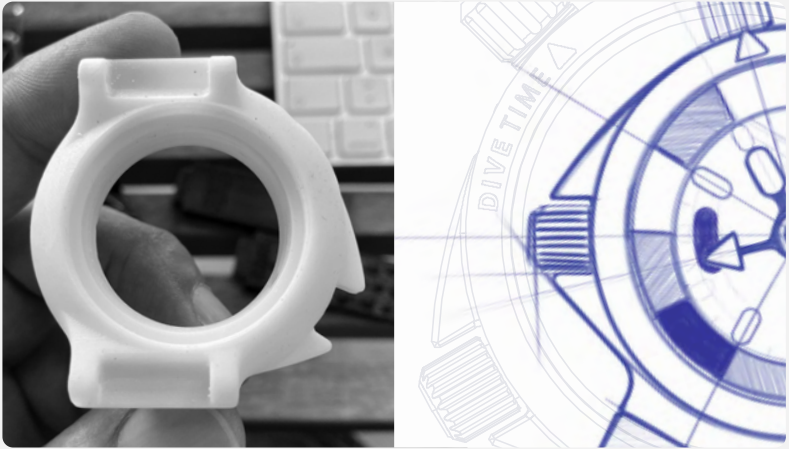

THIS IS NOT A WATCH. IT'S A
FROG300GMT

A BIT OF OUR HISTORY

Every brand was unknown once. OX® is young too. Passion, perseverance, a distinctive identity and the determination to keep moving forward are what help a company endure.

The first FROG300 GMT units reached their owners in December 2024, after months of waiting – in some cases, almost a year.

OX® got off to a strong start: by leaving no one indifferent.

OX OCEANIX WATCHES

The OX® project was born in 2021. The company was established in the United States in 2023.

At the end of 2025, following the closure of the U.S. company, OX® established its corporate structure in Hong Kong, much closer to its production center in Shenzhen.

There, each watch is individually assembled with meticulous attention to detail, keeping intact the ethos on which the project was founded.

THE IDEA FOR OX® CAME FROM JOSEPH BOLART, A COLLECTOR AND COMMUNICATOR SPECIALIZING IN JAPANESE WATCHMAKING, DESIGNER, ENGINEER AND DIVING INSTRUCTOR.

AND IT WASN'T IN A GARAGE.

IT WAS AT A BEACH BAR OVERLOOKING THE SEA, IN CABO DE GATA, ANDALUSIA, IN AUGUST 2021. THAT IS WHERE THE FIRST SKETCHES APPEARED, ALONG WITH **ONE VERY SPECIFIC OBSESSION: TO CREATE THE 99% PERFECT DIVER'S WATCH.**

WHAT STARTED AS A PASSION ENDED UP BECOMING A BUSINESS ADVENTURE.

OX® SHZ FACILITIES CENTER

HOW WE DO THINGS AT OX®

The OX® SHZ Facilities Center, our production center in Shenzhen, one of the world's major technology hubs, opened its doors in November 2024, just before the first production run of the FROG300.

In an environment of almost surgical control, the entire process flows within the same area: assembly, regulation, inspection and final preparation, until each OX® is ready for packaging.

'THE DREAM TEAM' (FROM LEFT TO RIGHT): JOSEPH BOLART, XIONGHUI HUANG, SKY-MA.

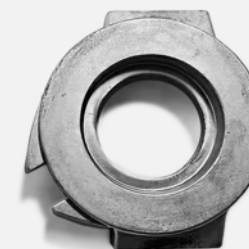

NASA ARTEMIS II FROG300 GMT LIMITED EDITION OF 254 UNITS (SOLD OUT).

SO, HOW DO WE DO IT? One fact worth its weight in gold: to date, not a single OX® sold online has been returned. Quite the opposite: many owners write to tell us the watch has exceeded their expectations.

FROG300 CASE

CNC PRECISION
MACHINING

The OX® FROG300 case starts from a piece of Grade 3 titanium. After the compression and densification process during the formation of its primary shape, it moves on to precision CNC machining, as do the outer bezel and caseback. Manufacturing a case requires **19 independent machining operations**, followed by hand polishing, micro-sandblasting and a final hardening treatment.

FROG300 PRO GMT

TECHNICAL SPECIFICATIONS & DIMENSIONS

CASE (MID-CASE)	PRO GMT	Machined Grade 3i Titanium ¹ , Sandblasted finish (micro-sandblasted). On the 18K Gold Series version, the finish is Gold IP (Ion Plated), Sandblasted (micro-sandblasted).
FRONT CLOSURE		Grade 3i Titanium bezel ¹ , Sandblasted finish. Water resistance is ensured by the OX® T-shaped gasket. On the Gold Series, the finish is yellow Gold IP (Ion Plated).
CASEBACK (REAR CLOSURE)	PRO GMT	Screw-down caseback in 316L stainless steel with a polished (gloss) finish, featuring a housing and thread for the blue ID+SYS™ disc. Screw-down Grade 3i Titanium caseback ¹ with Gold IP (Ion Plated) finish, featuring a housing and thread for the blue ID+SYS™ disc. On the Gold Series version, the caseback is made of solid 18K / 750 white gold alloyed with platinum.
CRYSTAL		High-transparency double-curved (domed) synthetic sapphire crystal, with blue AR anti-reflective coating on the inner surface.
MOVEMENT (CALIBER)	PRO GMT	Customized premium MIYOTA® 9015M automatic caliber with 24 jewels, operating at 4 Hz / 28,800 vph, with a 42-hour power reserve. Accuracy of -5/+15 seconds per day ² , with the date positioned at 8 o'clock. Customized premium MIYOTA® True GMT 9075M automatic caliber with 24 jewels, operating at 4 Hz / 28,800 vph, with a 42-hour power reserve. Accuracy of -2/+10 seconds per day ² , featuring a True GMT second time-zone complication (24-hour time zone) and the date positioned at 8 o'clock.
INNER DIVER'S BEZEL	PRO GMT	120-click unidirectional rotating bezel in 904L stainless steel, with micro-milled luminous markers filled with W9/X1-grade luminous material (varies by model). Nylon friction gasket. The bezel incorporates indicative depth/time references for recreational diving with air. These indications do not replace a dive computer, certified decompression tables or proper dive planning. 120-click unidirectional rotating bezel in 904L stainless steel, with micro-milled luminous markers filled with W9/X1-grade luminous material. Nylon friction gasket. Graphics and luminous elements, always filled, vary depending on the GMT model. On the Gold Series, the treatment is full (all graphics with monochromatic fill).
DIAL	PRO GMT	Applied hour markers filled with W9/X1-grade luminous material. White in daylight, green in low-light or dark conditions. Approximate duration is 6 hours on all areas containing luminous material, except on the HOT PINK, where duration is shorter. Depth Rainbow: tri-tone applied hour markers filled with W9/X1-grade luminous material. Red 24H sub-dial with red luminescence. Gold Series: monochromatic in 18K gold. Only the 12-3-6-9 hour markers feature luminescence.

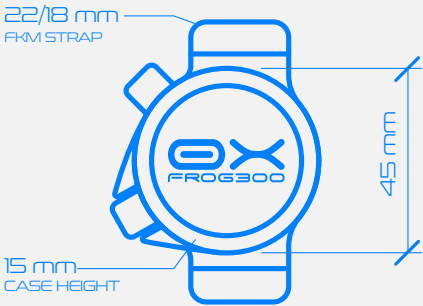

¹ OX® G3i Titanium offers greater hardness than conventional Grade 3 titanium, thanks to a specific compression and densification process applied during formation of its primary shape, prior to machining of the case and the subsequent finishing and final hardening treatments.

² The Gold Series caliber is regulated by OX® to an accuracy range of ±5 seconds per day (classification based on normal daily wrist wear at temperatures between 10°C and 25°C). Timekeeping accuracy may vary depending on other variables. Please keep this in mind.

HANDS	PRO GMT	Two colors are normally used: blue for the minute and seconds hands, and green for the hour or GMT hand. (The GMT hand is C5 red on the Depth Rainbow model. The GMT hand on the Aitutaki and Full Titanium models has a bluish tone. The Gold Series features a specially developed monochromatic Tiffany blue tone, grade X1.)
STRAPS OR BRACELET	PRO GMT	Cosmoband™ XL strap, made of slightly elastic nylon and fully adjustable thanks to its water-resistant Velcro-style fastening system. It can be trimmed from its original 255 mm length. The PRO Series is compatible with any FROG300 FKM strap or titanium bracelet. Watch strap made from premium FKM fluoroelastomer, highly flexible and resistant. The FROG300 GMT can also use the two-tone solid titanium bracelet or the textile NATO-style Cosmoband™ straps, both XL and standard.
CLASP	GMT	The standard clasp on FKM straps is made of G3i titanium, with 316L stainless-steel components, and is compatible with the solid titanium bracelet. It features summer/winter micro-adjustment as well as a Diver's extension for technical diving suits up to 5 mm, with two side buttons that allow quick release of the watch.
WATER RESISTANCE	PRO GMT	Complies with the ISO 6425 standard for saturation diving to WR 300 meters / 30 bar / 1,000 ft (sample tested up to 40 bar). Each watch is individually tested to 30 bar.
RESISTANCE TO THE ELEMENTS	PRO GMT	Also meets the ISO 1413:2016 "Shock Resistant" standard. Tested in accordance with MIL-STD-810H methods and procedures. A FROG300 has a magnetic resistance of 4,800 A/m, according to ISO 764:2020.
OTHER SPECIFICATIONS		The internal bezel is operated by the "Dive Time" crown positioned at 10:30. The time and GMT setting crown is screw-down and positioned at 8 o'clock. An auxiliary nighttime illumination function is located on the side of the case marked "FROG". All FROG300 models feature a helium escape valve.
BOX CONTENTS		White-finished cardboard box with a high-density blue foam interior. Includes a breathable blue fabric pouch for storing the watch and a set of tools for changing the watch strap. QR code providing direct online access to the owner's manual and initial setup instructions, such as strap adjustment. The Gold Series is delivered in special packaging.

INTERNATIONAL WARRANTY

OX® LIMITED INTERNATIONAL WARRANTY

Every OX® tool watch includes a 2-year limited international warranty, extendable up to a total of 6 years through the OX® warranty extension program, available depending on model and commercial terms.

INTERNATIONAL
WARRANTY
UP TO 6 YEARS

BUYING AN OX® TOOL-WATCH

YOU CAN PURCHASE YOUR OX® TOOL WATCH WITH COMPLETE CONFIDENCE.

OX® currently sells online worldwide, with fast and secure shipping. Since mid-2026, we have also begun developing a carefully selected network of authorized importers and retailers.

Owning an OX® means entering a solid **ecosystem** of product, distribution, warranty and service.

DISTRIBUTION NETWORK

Watchmaking tradition.
Only the best.

OX® has begun adding selected distributors, retailers and display locations in strategic markets.

SERVICE & OX® SERVICE CENTERS

After-sales service and international warranties are coordinated directly through the OX® structure, with a door-to-door¹ pickup and return service, handled as quickly as possible.

We have a European service center in Spain. For all other territories, service is currently coordinated from Hong Kong or Shenzhen. OX® is also working to establish a service center in the United States.

¹ DOOR-TO-DOOR SERVICE IS SUBJECT TO LOGISTICS COVERAGE AVAILABLE IN EACH COUNTRY OR TERRITORY AND TO THE APPLICABLE WARRANTY AND SERVICE CONDITIONS.
